Kickstand	No	Yes
Daisy Chain Capable	No	Yes
Stackable	Yes	Yes
Power Cord	20 ft. / 6 m	20 ft. / 6 m

You get more drying productivity and profits with the Windshear™ Storm! Utilizing "Driven Air" technology, this compact unit is changing the blower/dryer market as we know it today. The Windshear™ Storm is dramatically lighter and smaller, offering high airflow volume with velocity of 3,400 feet per minute. What's more, with a compact and light "briefcase-style" profile and maximum running amps of only 2.8, this unit creates the perfect Storm of drying performance, size and affordability.

Available in standard or deluxe models, the upgraded version allows you to daisy chain up to five units on one circuit for energy-efficient drying, while reducing storage concerns in transport vehicles by stacking. Professional carpet cleaners and restoration professionals can take twice as many units to the job site, compared to traditional blowers. The Windshear™ Storm truly takes drying to a whole new level!

The Windshear™ Storm is made of durable poly materials for years of continuous use. Weighing up to 45% less than traditional blowers at just 17.75 pounds, the compact design delivers increased power in a lighter, slimmer profile and offers easier transport and storage.

QUIETER THAN CONVENTIONAL AIR MOVERS
If noise is an issue, the Windshear Storm measures 66.5 dB at its lowest setting, and is perfect for noise-sensitive indoor environments such as schools, libraries, hospitals, hotels and more.

MULTIPLE SPEEDS
The Windshear Storm has three speeds for more drying control.

DAISY-CHAINABLE
The deluxe model offers an integrated power outlet, enabling you to connect up to five air movers together at one time for whole-room drying in large spaces.

STACK TWICE AS MANY UNITS IN THE SAME SPACE
Now with the compact size of the Windshear Storm, you can store and transport twice as many blowers than before!

MULTIPLE POSITION SETTINGS
If you're looking for greater drying flexibility, the deluxe unit can be placed horizontally, vertically, on its side against the wall, or at a 20 degree angle with the kick-stand, directing airflow exactly where you need it most. The standard model offers two operating positions.
