Patented Bladder Design

The unique bladder design solution tank balances the weight of the machine whether it is full or not and maintains optimal brush pressure throughout operation, making the machine easy to use in self-contained mode.

Clear Tank Lids

The clear tank lids permit continuous monitoring of the fluid levels in both the solution and recovery areas of the tank and feature molded finger grips for quick removal.

Convenient Controls

The simple yet intuitive controls allow the operator to control the solution flow for smaller or larger square footage areas (pulse or continuous).

Versatility

This self-contained model has a full complement of optional accessories which allow for transforming the machine into a box extractor for ultimate versatility in tight space cleaning with a wand or hand tool.

Service-Friendly

The service-friendly design provides easy access to the brush roll and pressure jets as well as simple draining of solution and recovery tanks, making clean up a breeze and reducing downtime for repairs and maintenance.

Mobility

Large 10" rear wheels eases mobility on the job, up stairs and over curbs.
